Subject: FB Misinformation Claims_Help Debuning

Hi Carol, I hope you're well!

Our Misinformation Policy team has identified some claims that we were hoping your team could **help us understand if they are false and can lead to harm?** The three claims include:

1. Spike protein in COVID-19 vaccines is dangerous/cytotoxic
2. Guillain-Barre Syndrome (GBS) is a possible side effect of the COVID vaccine
3. Heart inflammation is a possible side effect of all COVID-19 vaccines (including non mRNA vaccines)

In addition, I was wondering if your team was aware of any global source of truth/database for vaccine adverse effects including possibly vaccine-related deaths?

Please let me know if you have any questions about the above, and thank you so much again for the CDC's help!

Best,
Liz
